Main school subject: Mathematics

## Employment

### Software Developer                     May 2022 - Present
Bertschi, Dürrenäsch
- Designed, developed, and maintained the company's internal and external software systems and homepage, leveraging technologies such as Docker, PHP, SQL, Node, and JavaScript.
- Built and integrated APIs and EDI interfaces to streamline data exchange and enhance system interoperability.
- Automated data analysis processes and Excel reports, improving efficiency and accuracy.
- Developed and implemented unit and integration tests to ensure software reliability and maintainability.
- Collaborated closely with customers and product management teams to design and deliver new features, while promptly resolving reported issues to ensure user satisfaction.
- Mentored and supervised apprentices, fostering their technical growth.

### Construction Worker                     Sep 2009 - Apr 2022
- Led and coordinated a team of workers to complete construction projects efficiently and to a high standard.
- Oversaw project timelines and resources, maintaining alignment with budgets and deadlines.
- Resolved on-site challenges and conflicts swiftly, demonstrating strong problem-solving and decision-making skills.
- Communicated with stakeholders, such as contractors and clients, to ensure clear understanding of project requirements and progress.
